SUMMARY

Senior Frontend Engineer & Technical Lead with 8+ years of experience architecting scalable enterprise platforms using Angular, TypeScript, and modern frontend technologies. Proven track record in frontend architecture, platform modernization, and performance engineering while leading cross-functional engineering teams in Agile environments. Experienced in direct client communication, technical roadmap planning, stakeholder alignment, and mentoring engineers to deliver business-critical healthcare and insurance solutions.

EXPERIENCE

ADYSAS Scientific Software Solutions LLC | Frontend Engineer | Kochi, India *Nov 2019 – Present*

- **Platform Architecture & Monorepo:** Architected an enterprise healthcare **Case Management platform (CMAPP)** within an Angular monorepo serving 100+ clinicians across major insurance clients, enabling modular feature deployment and cross-domain scalability.
- **Platform Modernization:** Led the frontend migration from Angular 13 to Angular 20, introducing Standalone Components, Angular Signals, and Tailwind CSS, which reduced overall bundle size by 20% and improved initial page load speed by 40%.
- **System Integration & Security:** Engineered dynamic UI workflows by integrating 100+ RESTful APIs, implementing robust JWT authentication, role-based access control (RBAC), and custom route guards for sensitive healthcare data compliance.
- **Performance Engineering:** Optimized application state and rendering efficiency using OnPush change detection, RxJS reactive pipelines, and lazy-loaded modules, achieving a 90+ Lighthouse performance score.
- **Testing & Quality Standards:** Introduced automated unit and integration testing frameworks (Jest / Jasmine), establishing mandatory code reviews and CI/CD quality gates that raised overall code coverage to 80%.
- **Technical & Cross-Functional Leadership:** Led and mentored a team of 4 frontend engineers alongside cross-team developers, establishing engineering standards and architectural direction. Drove global stakeholder communication, managed vendor alignment, and delivered precise implementation plans for critical product milestones.

Cognizant | Program Analyst | Bengaluru, India

Oct 2017 – Sep 2019

- Contributed to enterprise migration projects involving large-scale file transfer and integration workflows.
- Worked with IBM Sterling File Gateway (SFG) and related enterprise integration technologies to support secure data exchange processes.

SKILLS

- **Frontend Architecture:** Modular Architecture, Feature-based Design, Reusable Component Frameworks, Enterprise UI Systems, Responsive Design, Cross-Browser Compatibility, Performance Engineering
- **Languages:** TypeScript, JavaScript (ES6+), HTML5, CSS3, SCSS
- **Frameworks:** Angular (v12+), RxJS, Angular Signals, Signal Store, NgRx, Angular Material, PrimeNG, Tailwind CSS
- **Enterprise Engineering:** REST API Integration, Role-Based Access Control, JWT Authentication, Route Guards, HTTP Interceptors, Lazy Loading, OnPush Change Detection
- **Backend:** Node.js, Express.js, MongoDB, PostgreSQL
- **Tools:** Git, GitHub, CI/CD, npm, Netlify, Render, Vercel

EDUCATION

Bachelor of Technology (B.Tech), Computer Science and Engineering

Amrita Vishwa Vidyapeetham | Graduated: June 2017

AI PROJECTS

ClearMyDev – AI Developer Productivity SaaS (*Angular, Node.js, OpenAI API, Google OAuth, JWT, Netlify, Render*)

- **Full-Stack AI Workflows:** Designed and built a developer productivity SaaS that leverages AI to analyse code diffs, logs, and JSON payloads into plain-English debugging insights.
- **Authentication & Access Controls:** Implemented Google OAuth, JWT authentication, and backend usage tracking with rate-limiting to manage free-tier limits and platform stability.
- **Deployment & Operations:** Established automated production deployments hosting the Angular frontend on Netlify and the Node.js API on Render.

Notelt – AI Knowledge & Productivity Platform (*React, TypeScript, Node.js, REST API*)

- **AI-Assisted Features:** Architected a full-stack knowledge management system featuring rich-text note management, automated task extraction, and AI-generated daily productivity digests.
- **Secure API Architecture:** Designed scalable Express/MongoDB REST APIs with multi-user authentication and strict per-user data isolation.
- **Cross-Ecosystem Delivery:** Built a responsive, accessible React/TypeScript interface, showcasing strong cross-framework expertise across both Angular and React ecosystems

INDUSTRY COURSE COMPLETED

AI-901: Azure AI Fundamentals (Microsoft)

Meta Front-End Developer Certificate | Meta (Coursera)

Claude code 101 (Anthropic)
